

md-to-pdf

A **zero-dependency** Markdown to PDF converter written in *TypeScript* and executed directly by Node 24 — no build step, no bundler, no `node_modules`.

Why bother?

Most Markdown-to-PDF tools ship a headless browser. This one writes the PDF byte stream by hand and uses the 14 fonts that every PDF reader already has, so the whole thing is about 2,000 lines of JavaScript TypeScript and starts in milliseconds.

Inline formatting

Regular, **bold**, *italic*, ***bold italic***, `inline code`, ~~struck through~~, and a [link to the spec](#). Autolinks such as <https://nodejs.org> work too, as do entities (© — ...), em—dashes, "smart quotes", and escaped `*asterisks*`.

Hard breaks work:

this line follows a two-space break

and this one follows a backslash break.

Lists

1. Ordered items
2. ...with nested content
 - unordered child
 - another child
 - 1. and a third level
3. Back to the top level

✓ Task lists render real checkboxes

☐ Unchecked items too

✓ Even nested ones:

☐ like this

Loose lists get extra breathing room:

- First paragraph of the item.

A second paragraph inside the same item.

- Another item.

Code

Fenced blocks keep their whitespace and wrap long lines instead of clipping them:

```
export function measure(text: string, font: FontKey, size: number): number {
  const widths = METRICS[font].widths;
  if (widths === null) return encodeWinAnsi(text).length * 0.6 * size;
  return (
    [...encodeWinAnsi(text)].reduce(
      (total, byte) => total + (widths[byte - 32] || 556),
      0,
    ) /
    1000) *
    size
  );
}
```

Indented code blocks work as well.
They just need four spaces.

Blockquotes

Quotes can hold **any** block content, including lists:

1. like this one
2. and this one

...and they nest.

Tables

Feature	Status	Notes
Headings	✓	Six levels, PDF outline entries

Feature	Status	Notes
Tables	✓	Alignment, wrapping, repeated headers
Images	✓	Local PNG and JPEG
Footnotes	✗	Not supported

Reference links

Definitions can appear anywhere and be [used](#) before they are declared.

Long paragraph to force a page break and prove that content flows: Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.
